

Anti-slip disposable overshoes

Disposable overshoes for clean rooms are nothing new. However the risk of accidents through slipping has so far been overlooked. It is a risk which deserves to be taken more seriously.

basan has now introduced a disposable overshoe in polypropylene with a special anti-slip sole. These shoes are coated with a special elastomer and show outstanding anti-slip characteristics. The coating is impervious to fluids.

The overshoes are available in cartons of 400 shoes, size 16 inches (40,6 cm), colour white.

Prices, terms and conditions and data sheets are available on request.
